

Regardless of what segment of the cement or concrete industry you are in, Onsite Energy can work with you and your plant team to reduce your facility energy costs.

## Cement Production and Distribution Energy Efficiency Program 2010 – 2012

The Onsite Energy / Pacific Gas and Electric Company Cement Production and Distribution Program is targeted at providing the cement and concrete industries a cost efficient process for reducing energy consumption and costs by improving energy efficiency in both gas and electrical use. Since Onsite is paid by PG&E for these services, we can assist you with no direct costs to your company.

Whether yours is a cement production plant, cement distribution center or concrete manufacturing operation (including ready-mix, pre-cast, and concrete products manufacturing), Onsite Energy can bring its breadth of experience to help you identify and implement energy efficiency improvements in your facility.

Onsite is a full-service company. We offer engineering analysis by specialists with diverse systems capabilities that can assist you with identifying energy efficiency opportunities in your plant. Our goal is to reduce your energy usage and improve your bottom line.

Measure	Incentive
Electricity Savings Measures	\$100/kW plus \$.09/kWh saved annually depending on the type of project
Natural Gas Savings Measures	\$1.00/therm saved annually

## Easy To Participate

Let Onsite Energy provide you with the most comprehensive energy solutions for your company.

### Who Qualifies:

- Cement production plants
- Cement distribution facilities
- Concrete manufacturing
  - Ready-Mix Operations
  - Pre-cast Construction
  - Concrete Products Manufacturing

Each facility must be in the PG&E gas service territory for gas related projects or electrical service territory for electrical efficiency projects. Project applications must be submitted and approved prior to any construction work or material purchases begin.

### Eligible Projects:

This is a comprehensive program for energy efficiency in both gas and electric processes. Projects such as the following are supported:

- Variable frequency drives
- Material transport
- Plant lighting
- Compressed air improvements
- Fan changes
- Bag house improvements
- Process improvements
- Combustion Improvements
- Heat recovery applications

Pacific Gas and Electric Company supports a variety of companies promoting energy efficiency through funding by public goods funds. Onsite Energy is working together with PG&E to support our customers by assisting their efforts in energy efficiency.

This program is funded by California utility customers and administered by Pacific Gas and Electric Company, under the auspices of the California Public Utilities Commission.

"PG&E" refers to Pacific Gas and Electric Company, a subsidiary of PG&E Corporation. © 2010 Pacific Gas and Electric Company. All rights reserved.
