

Onsite Energy can work with you and your plant team to reduce your facility energy costs and resulting carbon emissions.

## SCE 2010-2012 Industrial Energy Efficiency Program

The Southern California Edison Industrial Energy Efficiency Program (IEEP) is designed to help industrial customers identify, quantify and implement energy efficiency /savings opportunities that exist in your various plant operating systems. Selected by SCE specifically for this program, Onsite Energy will assist you by:

- Identifying potential energy reduction measures and savings
- Completing a full energy analysis
- Providing full financial information (Simple Payback/IRR) your management needs to approve & implement energy projects
- Providing a full scope of work for project implementation
- Providing implementation costs by locally qualified contractors.
- Administering the SCE incentive process
- Verifying your energy measure savings following project completion as required by SCE

IEEP is a comprehensive energy efficiency measure identification and evaluation package for the SCE industrial client, and there are no direct costs to your company for this valuable service.

If you are determined to reduce your energy costs and/or reduce carbon emissions, we can provide engineering analysis by specialists with diverse systems experience that will assist you with identifying energy efficiency opportunities in your facility. Our goal is to help you hit your energy and carbon

## Easy To Participate.

Let Onsite Energy provide you with the most comprehensive energy solutions for your company.

### Who Qualifies:

- Non-Metallic Mineral Products and Production
- Paper Manufacturing Production
- Transportation Manufacturing and Equipment
- Wood Products
- Aerospace Manufacturing and Equipment
- Other industries
- (NAICS Codes 321, 322, 327 & 326)

Note:

- Project applications *must* be submitted and approved prior to any construction work or material purchases begin.

### Eligible Projects:

- Compressed air improvements
- Control system upgrades
- Dust collection systems
- Energy efficient motors/drives/fans
- Energy information systems
- HVAC system improvements
- Lighting system improvements
- Monitoring and targeting
- Process Improvements
- Vacuum systems

This is a comprehensive program for energy efficiency and demand reduction in electric processes. Savings opportunities are most commonly identified in the above areas.

Measure	Incentive
Electricity Savings Measures	\$100/kW plus \$.05 to \$.15/kWh saved annually depending on the type of project

This program is funded by California utility ratepayers and administered by Southern California Edison Company under the auspices of the California Public Utilities Commission, through a contract awarded to Onsite Energy Corporation. California customers who choose to participate in this program are not obligated to purchase any additional services offered by the contractor.
