

Onsite Energy can work with you and your plant team to reduce your facility energy costs and resulting carbon emissions.

2010-2012

Comprehensive Industrial Energy Efficiency Program

The Comprehensive Industrial Energy Efficiency Program (CIEEP) is designed to help industrial customers identify, quantify and implement energy efficiency /savings opportunities that exist in your various plant operating systems. Onsite Energy will assist you by:

- Identifying potential energy reduction measures and savings
- Providing implementation costs by locally qualified contractors.
- Completing a plant-wide energy analysis
- Administering the utility incentive process
- Providing full financial information (Simple Payback/IRR) your management needs to approve & implement energy projects
- Verifying your energy measure savings following project completion as required by SDG&E®
- Providing a full scope of work for project implementation

CIEEP is a comprehensive energy efficiency measure identification and evaluation package for industrial clients in the SDG&E service territory and there are no direct costs to your company for this valuable service.

If you are determined to reduce your energy costs and/or reduce carbon emissions, we can provide engineering analysis by specialists with diverse systems experience that will assist you with identifying energy efficiency opportunities in your facility. Our goal is to help you hit your energy and carbon reduction goals and improve your bottom line.

Onsite Energy Corporation
2701 Loker Avenue West, Suite 107 * Carlsbad, CA 92010

Easy To Participate.

Let Onsite Energy provide you with the most comprehensive energy solutions for your company.

Who Can Benefit:

- Pharmaceuticals
- Biotech
- Semi-Conductors/electronics
- Aerospace
- Food processing & distribution
- Manufacturing
- Refineries
- Cement production
- Chemical production
- Other industries

Note:

- Each facility *must* be in the SDG&E service territory and take electric and/or gas service from SDG&E.
- Project applications *must* be submitted and approved prior to any construction work or material purchases begin.

Eligible Projects:

- Boiler system improvements
- Compressed air improvements
- Control system upgrades
- Energy efficient motors/drives
- Energy information systems
- HVAC system improvements
- Lighting system improvements
- Low cost/no cost operation improvements
- Process improvements
- Process waste heat recovery
- Refrigeration system improvements

This is a comprehensive program for energy efficiency in both gas and electric processes. Savings opportunities are most commonly identified in the above areas.

Measure	SDG&E Incentive
Electricity Savings Measures	\$100/kW plus \$.05 to \$.15/kWh saved annually depending on the type of project
Natural Gas Savings Measures	\$1.00/therm saved annually

To participate please contact your SDG&E account representative or :
