

Onsite Energy can work with you and your plant team to reduce your facility energy costs and resulting carbon emissions.

## SCE 2010-2017 Energy Management Solutions

The Southern California Edison Energy Management Solutions, Third Party Implemented Program (Program) is designed to help industrial customers identify, quantify and implement energy efficiency /savings opportunities that exist in plant operating systems. Selected by SCE specifically for this Program, Onsite Energy will assist you by:

- Identifying potential energy reduction measures and savings
- Providing implementation costs by locally qualified contractors
- Completing an energy analysis
- Administering the SCE incentive process
- Providing financial information (Simple Payback/IRR) your company needs to approve & implement energy projects
- Verifying energy savings following project completion as required by SCE
- Providing a scope of work for project implementation

This Program is a comprehensive energy efficiency measure identification and evaluation package for the SCE industrial customer. There are no direct costs to your company for this valuable service.

If you are determined to reduce your energy costs and/or reduce carbon emissions, we can provide the services you will need to identify energy saving opportunities in your facility. Our goal is to help you achieve your energy and carbon reduction goals and improve your bottom line.

## Easy To Participate.

Let Onsite Energy provide you with the most comprehensive energy management solutions for your company.

### Who Qualifies:

- All Industrial NAICS Codes

### Eligible Projects:

- Compressed air improvements
- Control system upgrades
- Dust collection systems
- Energy efficient motors/drives/fans
- Energy information systems
- HVAC system improvements
- Lighting system improvements
- Data center and telecom
- Process Improvements
- Vacuum systems

#### Note:

Program Participation Agreements and Project applications must be submitted and approved prior to the purchase of materials and/or before construction work begins.

This is a comprehensive program for energy efficiency and demand reduction in electric processes. Savings opportunities are most commonly identified in the above areas.

Measure	Incentive
Electricity Savings Measures	\$150/kW plus \$.03 to \$.15/kWh saved annually depending on the type of project. Typically covers 20 to 50 % of the incremental project cost.

This Program is funded by California utility ratepayers and administered by Southern California Edison Company under the auspices of the California Public Utilities Commission, through a contract awarded to Onsite Energy Corporation. California customers who choose to participate in this Program are not obligated to purchase any additional services offered by the contractor.
